Memorandum

TO: Partnership Technical Advisory Committee

DATE: June 18, 2007

FR: Ellen Griffin and Catalina Alvarado, Public Information

W. I.

RE: **Transportation 2035 Public Outreach -- Slated for June 2007**

This memo outlines public outreach planned for the month of June 2007 for the Transportation 2035 Plan. This outreach leads up to the Commission's discussion in July of the proposed revised goals for the Transportation 2035 Plan, as well as Commission discussion on the planned scenario performance assessment. The outreach will include:

- A joint meeting with representatives from MTC's three advisory committees — the Advisory Council, Elderly and Disabled Advisory Committee and Minority Citizens Advisory Committee. The discussion will cover the approach to the development of the Transportation 2035 Plan and linkages to FOCUS priority development areas. The discussion also will center on the proposed revisions to the Transportation 2035 goals, and how the scenario performance assessment will inform the Transportation 2035 Vision and the financially constrained plan.
- The MTC Chair will meet with invited representatives from public, private and community interest groups that are expected to engage on the development of the Transportation 2035 Plan to get early input on the approach to the development of the Plan and the linkages to the FOCUS priority development areas; on the proposed revisions to the goals, and planned scenario performance assessment.
- One meeting open to the general public is planned for an evening during the week of June 25, exact date yet to be determined. The location will be the Joseph Bort MetroCenter in Oakland. The discussion will cover the approach to the development of the Transportation 2035 Plan and linkages to FOCUS priority development areas. The discussion also will center on the proposed revisions to the Transportation 2035 goals, and planned scenario performance assessment.

Regional Forum

In late October, MTC and ABAG will co-host a joint regional forum during which ABAG will announce proposed FOCUS Priority Development Areas as well as proposed Priority Conservation Areas; and MTC will provide results from its scenario performance assessment that will inform a preliminary Transportation 2035 Vision. Public comment will be sought on how the region can implement the priority areas, address key issues like climate change, and meet proposed transportation goals.
